

I am SubContractor for the CSD and Sprint installation and service the videophone.
Alot people told me "Why SorensonVRS blocked with SprintVRS.TV and others?".

Also hey said "Why they do seperate phone numbers between Sprint and SorensonVRS? and it's not make sense! that will not lose their business for phone numbers."

People asked me "Can you remove the sorensonVRS and install D-Link under the Sprint and CSD because I am tired with SorensonVRS to wait so LONG and caused some the store closed as passed time."

Also some of people told me that some people have SorensonVRS VP-100 and their other friend have the D-Link VP, When people who had the SorensonVRS and wanted call with relay, they came over to their friend who had the D-link VP to use relay because it is FAST answer! and they do often also they who had the sorensonVRS are await for D-link VP to install then will remove the SorensonVRS.

That what they said. I have heard alot.

I hope that SorensonVRS ALLOW any VRS such Sprint, HOVRS, etc use on the SorensonVRS VP-100.

My optition:

I suggest ALL companies such CSD, SprintVRS, SorensonVRS, HOVRS, and others go marige together in one had company easier for deaf people to use instead they confused with each companies.

--OR--

I suggest that ALL of the VRS services do be compatible works each others such SprintVRS can use SorensonVRS Vp-100, and HOVRS can use D-Link VP, make all mixed and deaf people can choice VRS service they wanted.

I guess that's all.

Thanks!
